

New Registration Platform for PEP

PEP ecopassport Program

Why a new registration platform ?

- Obsolete technology for the current platform
- Adapt to changes (regulations, PCR, process...)
- Need to better share data
- Improve usability, better documented...

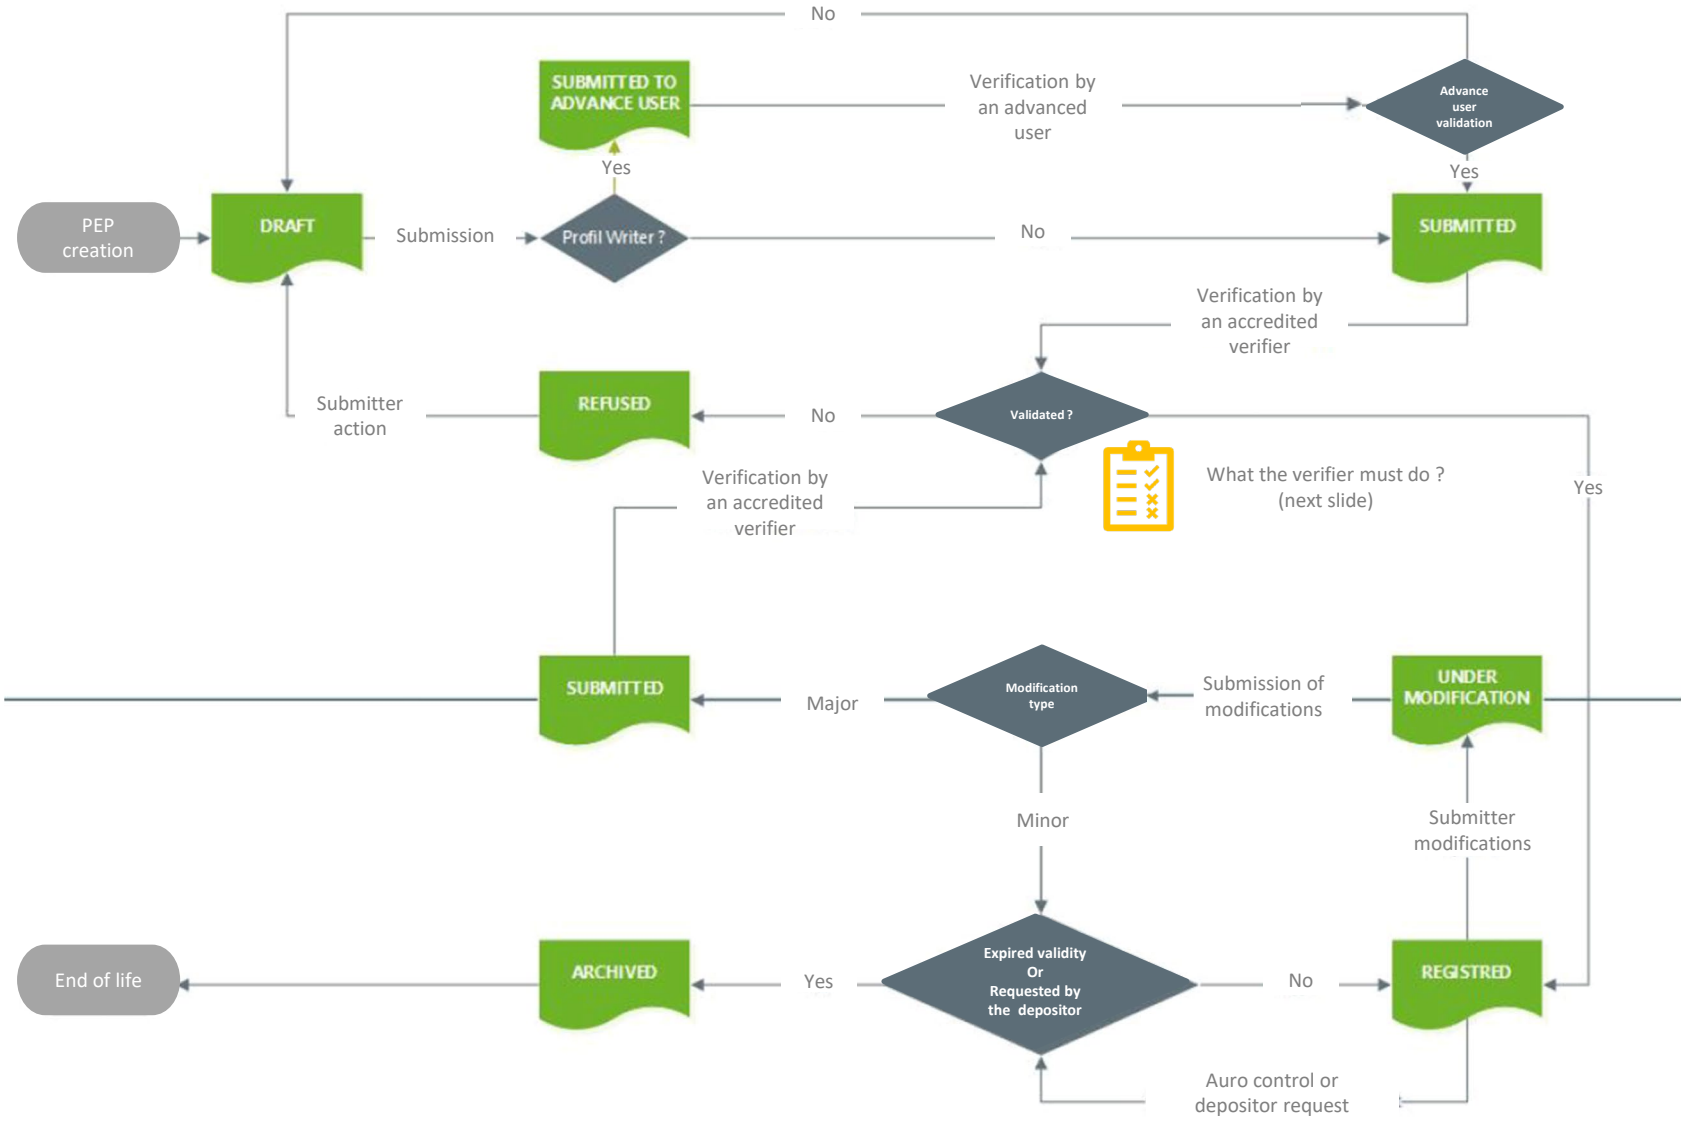

Main evolutions

- Ergonomy
 - PEP database with easy search
 - On-screen documentation, user guide
- Open: values sharing
 - INIES, API, ECO Portal
 - Visible PEP data
- Redesign of the registration workflow
- PEP code can be attached to a trademark
- Possibility to deposit .xml files
- ...

Registration Workflow

The verifier « duty »

- Verify that the numerical data is as described in the PEP

- Submit in the database for the PEP concerned :
 - The Verification Report
 - The declaration of Conformity

- Validate the PEP for the next step : the validation of the order that will trigger the registration and publication of the PEP, and therefore the invoicing for the recovery of the registration fees.

Continuous improvement...

- Report any bugs
- Suggest improvements
